KEY RESULTS

−70%

processing time on recurring reporting and quality checks, through automation (Orange CI)

+73%

three-month retention rate after customer segmentation and campaign targeting (Orange CI)

1 model

predicting sales-partner underperformance, enabling partner-level management (Orange CI)

TOOLS

R · Python · SQL · PostgreSQL · Oracle · Starburst · Talend · Power BI · Power Query · Shiny · SPSS · QGIS · Excel

EDUCATION

2022 – 2023
MSc (Master 2) in Econometrics and Statistics

2021 – 2022
Master 1 in Econometrics and Statistics

2018 – 2021
BSc in Economics and Statistics
International University of Applied Sciences and Technology (Abidjan)

CERTIFICATIONS

Coursera · Data Analysis and Visualization with Power BI (in progress)

Coursera · Fundamentals of Data Science

LANGUAGES

French: fluent

English: intermediate

Mame Abdoulaye Diouf.

Data scientist · Data analyst · Data engineer · Business analyst · Performance management

PROFILE

An econometrician by training, I build reliable data pipelines, automate reporting end to end, turn data into analyses that change decisions, and coordinate large-scale data projects. I also train teams to use decision-support tools, so that data genuinely drives performance management.

SKILLS

Data engineering
Multi-source ingestion, ETL pipelines in R, SQL and Talend, orchestration of scheduled jobs, data quality checks, data marts, Data Mesh.

Reporting automation
Fully automated daily reporting: extraction, consolidation, checks, refresh of Excel and Power Query templates, distribution.

Analytics and modelling
Churn, segmentation, logistic regression, Random Forest, XGBoost, forecasting, data mining.

Performance management and BI
Power BI and Shiny dashboards, real-time KPI tracking, sales and franchise performance management, team training.

Business analysis
Requirements gathering, KPI design, gap analysis, recommendations to steering committees, coordination of multi-stakeholder projects.

PROFESSIONAL EXPERIENCE

Operational Data Miner · Way2Call Group
Since March 2026

- Data interface between the group and partner brokers' data teams, integrating and securing leads across the group's CRMs.
- Coordinated set-up and go-live of every new campaign with service providers.
- Built ETL integration pipelines and automated R and SQL extractions to standardise operational data flows.
- Automated Excel report refresh (email file preprocessing, then update): one hour cut to 15 minutes.
- Real-time Shiny and Power BI dashboards; CRM data mining to target high-potential customer segments.

Data Analyst · Orange Côte d'Ivoire
Nov 2023 – Feb 2026

Performance and project management, then channel and Broadband sales management

- Analysed and reported sales performance by channel, with growth-oriented recommendations.
- Power BI dashboards tracking sales, top-ups, backlog and customer complaints in real time.
- Predictive model detecting underperforming sales partners, which led to a new sales territory design.
- R and SQL ETL scripts and analytical tables: −70% processing time on reporting and quality checks.
- Studied the link between complaints and churn, segmented customers: +73% three-month retention.
- Company projects: Data Mesh (domain data products, governance) and Mawthawer (regional KPI data marts).

Data Manager · Société Générale Côte d'Ivoire
Sep – Nov 2023

- Defined data requirements for the Testing Factory unit's projects.
- Prepared, cleaned and delivered datasets for test campaigns.
